P&L Previous Year Comparison Report

<u>Summary:</u> This report summarizes your income and expenses for both this selected period and this same period last year.

<u>How to Run It:</u> Go to the Reports menu, click Company & Financial, and then click Profit & Loss Prev Year Comparison.

How Often to Run It: Monthly, after all transactions are recorded for that month

Who Benefits From It: Owners and upper management

Why You Need It: This report will tell you how successful you are at your day-to-day core business and how financially efficient you are. By comparing your results to last year you can provide quick insight into whether your revenue is growing or contracting as well as how fast expenses are rising.

The intermediate lines in the report show subtotals for each income or expense account in your chart of accounts. The last line shows your net income (or loss) for this period and the same period last year.

Balance Sheet Previous Year Comparison

<u>Summary:</u> This report compares the worth of your business as of a specific date to the same date last year. The report calculates how much your business is worth (your business's equity) by subtracting all the money your company owes (liabilities) from everything it owns (assets). The total for equity includes your company's net income for the fiscal year to date.

<u>How to Run It:</u> Go to the Reports menu, click Company & Financial, and then click Balance Sheet Prev Year Comparison.

How Often to Run It: Monthly, after all transactions are recorded for that month

Who Benefits From It: Owners and upper management

<u>Why You Need It:</u> The Balance Sheet will show you the true value of your business at any point in time. And as with your P&L Statement, it's important to compare where certain balances stand now versus last year:

- Cash
- Accounts Receivable
- Accounts Payable
- Other Liabilities, such as lines of credit or short term loans

The change and % change columns provide the comparison to one year ago. They show how much the balance of each balance sheet account has changed since a year ago.

Statement of Cash Flows

<u>Summary:</u> This report shows you exactly what caused your bank balance to increase or decrease during a given report period. It shows the amount of cash earned from profit, where you received additional cash, and where your cash was spent.

This report breaks down your cash activities by:

- Operating Activities
- Investing Activities
- Financing Activities

<u>How to Run It:</u> Go to the Reports menu, click Company & Financial, and then click Statement of Cash Flows.

Who Benefits From It: Owners and upper management

How Often to Run It: Monthly, after all transactions are recorded for that month

<u>Why You Need It:</u> This report shows you how your net income from the profit and loss statement differs from what you have in your checking account and why. The amounts on the cash flow are derived from changes to your Balance Sheet accounts. This report answers the question: Why does my profit and loss statement say I am earning a profit but I don't have any money in the bank?

The following items are considered operating activities:

- Cash receipts from:
 - The sale of goods and services
 - Short-term and long-term notes receivable in connection with sales of goods and services
 - Interest and dividends
- Cash payments for:
 - o Inventory
 - o Wages
 - o General and administrative expenses

The following items are considered investing activities:

- Cash receipts from:
 - Sale of property and equipment
 - o Collections on loans
 - Sale of securities
- Cash payments for:
 - Purchase of property and equipment
 - Loans to others

o Purchase of securities

The following items are considered financing activities:

- Cash receipts from:
 - o Short-term and long-term borrowing
 - Owner contributions or Issuance of stock
- Cash payments for:
 - O Owner draws and dividends
 - o Repayments of short-term and long-term obligations

Collections Report

<u>Summary:</u> This report provides customer contact names and phone numbers and shows all overdue invoices and statement charges by customer or job.

<u>How to Run It:</u> Go to the Reports menu, click Customers & Receivables, and then click Collections Report.

How Often to Run It: Monthly, so that you can keep on top of collections calls

Who Benefits From It: Controllers and bookkeepers as well as owners and upper management

Why You Need It: Tricky economic times mean it is more important than ever to keep track of your collections. You can use this report to quickly make phone calls to customers with open balances or e-mail copies of overdue invoices to your customers.

To email an invoice, double-click on a transaction within the Collections report to view the invoice, and then click the Send button at the top of the invoice form to display the Send Invoice form. You can modify the wording shown to be more direct, such as a subject line of "Overdue Invoice" or perhaps e-mail text along the lines of "I've attached a copy of your overdue invoice. If there's a problem with our products or services, please let me know immediately, otherwise I trust that you'll remit payment promptly." To change the default e-mail text, choose Edit, Preferences, and then choose Send Forms. Select Invoice from the Change Default For list, make your changes, and then click OK.

A/P Aging Summary

<u>Summary:</u> This report summarizes the status of unpaid bills in accounts payable, showing what you owe, who you owe it to, and how much is overdue.

For each vendor to whom your company owes money, the report shows how much your company owes for the current and previous billing periods, and it shows the total amount. The report also shows the total amount owed to all vendors.

How to Run It: Go to the Reports menu, click Vendors & Payables, and then click A/P Aging Summary.

How Often to Run It: Weekly, or at the beginning of each A/P cycle

Who Benefits From It: Controllers and bookkeepers as well as owners and upper management

<u>Why You Need It:</u> Although it's key to make sure that your customers are paying in a timely fashion, it's just as important to pay your vendors, too. Unpaid bills can result in phone calls, emails, and other unnecessary interruptions.

Trial Balance

<u>Summary:</u> This report shows you all account balances in a concise format.

How to Run It: Go to the Reports menu, click Accountant & Taxes, and then click Trial Balance.

How Often to Run It: As often as would be convenient to see your balances in this format

Who Benefits From It: Controllers and bookkeepers

Why You Need It: It is a quick and easy way to see account balances and quickly research anything that looks out of order.

It's one of the few reports in QuickBooks that uses the terms Debit and Credit. If anything looks out of order, simply double-click on the amount to view the underlying detail.

Voided/Deleted Transactions Summary

<u>Summary:</u> This report shows you any transactions that have been voided or deleted from QuickBooks.

<u>How to Run It:</u> Go to the Reports menu, click Accountant & Taxes, and then click Voided/Deleted Transaction Summary.

How Often to Run It: Bi-monthly to check for unknown voided and deleted transactions

<u>Who Benefits From It:</u> Controllers, owners or upper management – anyone who needs to review someone else's work in QuickBooks

Why You Need It: It's no surprise that small businesses are much more prone to fraud than large businesses. Small business employees usually wear multiple hats, so it's often impossible to separate financial duties (bigger businesses can do this with ease). Fraud usually rears its ugly head in a small business through altered or "vanishing" transactions.

With this report, you will be able to quickly identify any transactions that have been voided or deleted from QuickBooks. Granted, this is not an end-all solution, but it is a helpful management tool. Plus, if a transaction ends up "vanishing" from QuickBooks, you can use this report to see who deleted it!

For more detailed information on voided or deleted transactions, run the Voided and Deleted Transactions Detail report.

You can also see voided transactions in a custom detail report or through the find feature.

To find and view voided transactions using a Custom Transaction Detail report

- 1. Go to the Reports menu and click Custom Transaction Detail Report.
- 2. On the Display tab, click one of the predefined date ranges, or enter another date range using the From and To fields (the default value is This Month-to-date).
- 3. Click the Filters tab.
- 4. Select Voided from the Filter scroll box and select Yes.
- 5. To include non-posting transactions (transactions that do not affect income, expense or balance sheet accounts such as sales orders or pending invoices) in this report, select Posting Status from the Filter scroll box.
- 6. Select either Posting or Non-Posting (the default value is Posting).
- 7. Click OK to view the report.

To find and view voided transactions using Advanced Find

1. Go to the Edit menu and click Find.

- 2. Click the Advanced tab.
- 3. Select Entered/Modified from the Filter scroll box.
- 4. Click the Entered/Modified drop-down list and choose one of the predefined date ranges, or enter another date range using the From and To fields (the default value is All).
- 5. Select Voided from the Filter scroll box and select Yes.
- 6. To see only posting transactions, select Posting Status from the Filter scroll box and select Posting (the default value is Either).
- 7. Click OK to view the report.

Audit Trail

<u>Summary:</u> This report shows every accounting transaction and any additions, deletions, or modifications that affect that transaction.

How to Run It: Go to the Reports menu, click Accountant & Taxes, and then click Audit Trail.

How Often to Run It: Bi-monthly to check for unknown transaction changes

<u>Who Benefits From It:</u> Controllers, owners or upper management – anyone who needs to review someone else's work in QuickBooks

Why You Need It: This report provides another useful tool when you discover something is not right either by viewing a transaction or a report. You can run this report for a specific filter and see what is going on.

The audit trail was an optional feature in earlier versions of QuickBooks, but is permanently enabled in recent versions of QuickBooks. This provides a complete record of every entry made in QuickBooks. The downside is that you can end up with a massive report - don't worry. It's easy to filter this report and narrow your search. Once the report appears, click the Modify button, and then click on the Filters tab. You can filter by date range, amount, or dozens more fields.

Warning: the audit feature cannot be turned off, however, if you use the condense data feature, the process will remove all deleted transactions from the audit trail report.

What Changes are Tracked?

To make this report easier to use and understand, QuickBooks does not track changes to transactions that do not impact their accounting integrity in the audit trail. Changing the following information about a transaction will cause it to be included in this report:

- Transaction Date
- Document Number
- Payment Terms
- Sales Rep
- Shipping Date
- Modifying User
- Account
- Class
- Associated name
- Amount
- Quantity
- Unit Price

- Item
- Payment Method
- Due Date
- Whether the line item represents a discount or not
- Reconciliation status
- Posting status
- Billed Date
- Transaction Type

What information about each transaction is included in the report?

Any information about the transaction that has been changed is highlighted in **Bold Italic type** in the report. If there are multiple versions of a transaction, the earliest version will have no highlighting, but subsequent versions will highlight each value that differs from the previous version's value in that field by displaying the value in bold italics. If a line item was added to the transaction, that entire line of the report will be highlighted.

Each transaction is identified by a bold heading (for example, **Check 101**). The transaction heading information always appears in the following order:

- 1. The type of transaction (deposit, check, bill payment, etc.)
- 2. The document number (if applicable).

Note: The Num column displays the user-specified transaction number for each modified or deleted transaction. This field will be blank if a transaction is ready for printing and has not yet been assigned a transaction number.

The State column identifies whether you are looking at the most recent version of a transaction (the Latest) or an earlier version of the same transaction (a Prior). Transactions may have multiple Prior entries listed, but only one Latest.

This status (Latest or Prior) is automatically assigned by QuickBooks as transactions are added, deleted, or modified. To view the most current version of the transaction, double-click any field in the Latest entry in the report.

How is this report sorted?

By default, the Audit Trail report is sorted by the user who created or last modified the transaction, the transaction type, and the date the transaction was created or last modified.

What happens when a new transaction is added?

When a transaction is added, one entry is listed directly under the transaction heading in the Audit Trail report.

For example: if you write a check on 12/01/11, the transaction heading entry in the Audit Trail report will look something like this:

Num	Entered/Last Modified	Last modified by	State
Check 6	84		
604	42/04/44/02/02/42		T
684	12/01/11 08:39:10	Admin	Latest

What happens when an existing transaction is changed?

When a transaction is modified or deleted, the change displays directly under the transaction heading. If a transaction is modified more than once, a Prior entry for each change displays under the same transaction heading.

Although the report is sorted within the heading group by the date the original transaction was created, multiple changes to the same transaction are sorted by date of occurrence.

For example: a bill payment entered on 12/01/11, modified on 12/10/11 and then again on 12/15/11, will look something like this:

Num	Entered/Last Modified	Last modified by	State
Bill Pmt-	-Check 342		
342	12/15/11 10:12:05	Admin	Latest
343	12/10/11 10:15:42	User2	Prior
343	12/01/11 09:38:19	Admin	Prior

Setting a closing date password.

In order to prevent transactions from prior periods being edited, you can set a closing date password in QuickBooks. The Closing Date marks when your company's books have been closed. You set a closing date password to protect your records against changes that would alter balances for closed accounting periods. These changes include editing or deleting transactions entered on or before the closing date, and entering new transactions dated on or before the closing date.

You can set or change the password at any time. Also, if you lost or forgot the closing date password, then you can remove the password. But, to perform these functions, you must be logged into the QuickBooks Company File as the **ADMIN** user.

Detailed instructions on Setting the Password.

- 1. From the Edit menu, select Preferences.
- 2. Click Accounting and then the Company Preferences tab.
- 3. In the Closing Date section, click the **Set Date/Password** button.

- 4. In the Date section, select the date through which you want your books to be closed.
- 5. (Optional, but recommended) Enter a password in both the Password and Confirm Password fields to limit access to the closed accounting period. (If you forgot the closing date password, just remove it from this step in the password screen and the confirm password screen, but this only works if you are logged in as admin).
- 6. Click OK.

Previous Reconciliation

<u>Summary:</u> This report shows the detail of how a particular account reconciled as of the report date.

How to Run It: Go to the Reports menu, click Banking, and then click Previous Reconciliation.

How Often to Run It: After each time you reconcile an account

Who Benefits From It: Controllers and bookkeepers

Why You Need It: It's a good practice to always print at least the summary report once you've reconciled a bank or credit card account. Someone else could edit a reconciled transaction, which could cause the reconciliation to be out of balance. A printed copy of the report will show that the account reconciled as of the report date, although you will still have to untangle the edited transaction.

QuickBooks Premier or Enterprise Solutions edition let you view reconciliation reports for **any** previous reconciliation period. However, QuickBooks Pro edition lets you view only how you reconciled an account for the most recent reconciliation period. In all versions, when you run a reconciliation report you have the following options:

There are two different types of reconciliation reports that can be run:

- 1. **Summary:** to summarize the account activity for the reconciliation period.
- 2. **Detail:** to list all the transactions cleared in the reconciliation period.

There are also two different types of transactions to include in the report:

- 1. **Transactions cleared at the time of reconciliation.** This report is a snapshot of the previous reconciliation, and shows you what was reconciled. This report opens as a PDF file.
- 2. Transactions cleared plus any changes made to those transactions. This report shows the current state of each transaction cleared in the previous reconciliation for an account. Transactions that have been deleted or assigned to another account will no longer show. This report opens as a QuickBooks report.

If you notice any errors in the previous reconciliation, you can undo the reconciliation to fix the problem(s).

Transaction History

<u>Summary:</u> This report shows the entire history for a given transaction breaking them down into debits and credits of the affected accounts.

How to Run It: While already in a transaction go to the Reports menu, click Transaction History.

How Often to Run It: As needed to see transaction detail in this manner

Who Benefits From It: Anyone reviewing transactions in QuickBooks

Why You Need It: This report is extremely useful for documenting what happened in a specific transaction or understanding what accounts were affected.

Think of this as a "report within a report", as you can only run it in certain circumstances. To view this report you must already have a transaction open on the screen or single-click on a transaction within a report.
